

# Islamic Organizer For Nokia \$80

# Introduction

ASGATech proudly presents you the Islamic Organizer for new Nokia 9300i with many useful features for Middle East users. ASGATech Islamic Organizer simply helps adapt your smart phone to your culture to make your life easier.

Islamic Organizer offers many features:

- Support 3-language UI: Arabic, English and French. •
- Very nice and comfortable user interface.
- Hijri-Calendar based Organizer.
- Convert from Gregorian to Hijri date and vice versa.
- Instant synchronization with device default calendar entries.
- Prayer times for more than 200 cities.
- Display prayer times for any day of the year.
- Cover all methods of calculating prayer time.
- Selective prayer alarm.
- Two ways of displaying the Qeblla direction. ٠
  - o Relative to North.
  - o Relative to Sun.
- Selective auto-start with device.
- Display of important Islamic Events.

# **Installation**

Use Nokia PC Suite for installation or copy the installation package 'Organizer.sis' to your device memory. Refer to your phone user manual for more information about installing new applications.

During installation process, some dialogs will pop up. Read these instructions and take the proper action.

	notes.txt Release Notes:	Insert object						
	This application might not be uninstalled	Font						
	correctly from the phone, if you ever got an error message like this "Error: "There was an	Style						
•	unknown error uninstalling 'Organizer' " ;please do the following:	Exit						
	Figure 1 Installation instructions							

## Note

When notes.txt window appear on your mobile phone's screen press 'Exit' button, and continue your installation process normally.

# Using Islamic Organizer

The application can be divided into 4 parts: Main View Calendar Islamic Events Settings

#### **Main View**

Main view displays a number of useful information to the user at the same time, such as:

- A. **Current prayer**: this is the prayer that should be performed at the moment, the time for this prayer is generally between a time of prayer and the time of next prayer.
- B. Time left for next prayer: this is the time left for the next time prayer to come.
- C. All today prayer times: a table for all today prayer times depending on the selected city and the date.
- D. **Qeblla direction for currently selected city**: either relative to North or Sun. This can be set from application settings.

Note that Qeblla is forced to be displayed relative to North after sunset till sunrise.

- E. **Next Islamic event**: this is the next Islamic event in the calendar, all Islamic events can be viewed on Islamic Events part.
- F. **Next entries in the calendar**: This is all day entries for the next day that has at least one entry.

Main view can also display the prayer time on certain date by selecting this option from menu View>Prayer Times.

You can edit next calendar events and view next Islamic event details by pressing Enter after selecting the desired item.

## Prayer time alarm

Figure 3, prayer time alarm window

When a prayer time comes, organizer will popup with this window with the Azan sound to notify you

Figure 4, Calendar

Calendar is responsible for adding/editing/deleting calendar entries. You can start the calendar from the Main View either by pressing 1st CBA button or by selecting menu View>Calendar. The Calendar window consists of 2 parts, Calendar grid and events list; you can switch between them by pressing Tab.

You can view calendar in 2 modes, Month view and week view. You can switch between views by pressing Switch View on the 1st CBA button or by selecting menu View>Switch View. There are a number of functions you can perform in Calendar, such as:

#### - Adding Entries

#### Figure 5, Calendar

Click on the Add Entry button or directly press Enter twice on an empty day. You can also select menu Edit>Add Note. There is a shortcut key (CTRL+N) also that can be used.

#### - Deleting Entries

Figure 6, Calendar

Select the desired entry to be deleted and select Edit>Delete Entry or press Back Space button. You will get a confirmation message press Ok to delete or Cancel to cancel the deletion.

## - Editing Entries

Figure 7, Calendar

You can edit entry by pressing Edit Entry on 3rd CBA button when an entry is selected, by selecting menu Edit>Edit Note or by pressing Enter on a selected entry.

#### - View Islamic Events

Figure 8, Calendar

You can view Islamic event by pressing Show on 3rd CBA button when an Islamic event is selected, by selecting menu View>Display Islamic Event or by pressing Enter when selecting an Islamic event.

#### - Navigation

#### Figure 9, Calendar

You can move between days using arrow keys when the calendar grid is selected. You can also make fast transition month by month by holding CTRL while using the arrow keys. For large transition use go to date by selecting menu View>Go to Date or pressing CTRL+G, this will cause a dialog box to appear so you can enter the date you want to move to. Enter the date and press Ok.

#### - Date conversion

#### Figure 10, Calendar

You can convert dates between Gregorian and Hijri calendar immediately by selecting menu View>Date Conversion or by pressing CTRL+C; this will display a date conversion dialog which will allow you to select the direction of conversion then immediately convert date as you type.

#### - Closing
